Ear Piercing Aftercare Instructions

During the first 6 weeks:

- Always wash your hands prior to touching a child's ears.
- Twice daily, turn child's earrings completely around to prevent them from adhering to the ear.
- Cleanse the front and back of a child's ear 3 times a day with antibacterial soap and water.
- Keep the pierced area clean and dry, always consider extra cleaning after Swimming, Showering, and using Hair Products or Exercise.
- Be careful when removing clothing or brushing hair so the earring does not get caught. Consider covering earring with band aids during sports or outdoor play.
- **DO NOT** remove the earrings for at least 6 weeks. After 6 weeks you should switch earrings to a new pair of earrings with thinner posts.

For the first 6 months, **DO NOT** go longer than 24 hours without earrings to prevent skin from closing.
